STRENGTHS

Debugging and Critical Thinking

Highly proficient in debugging and critical thinking, ensuring the delivery of high-quality software solutions.

Collaboration and Leadership

Strong collaboration and leadership skills allowing effective teamwork across diverse projects.

SKILLS

Java Typescript Javascript Node.js
Angular React MySql Postgresql
MongoDB RabbitMQ BullQ MQTT AWS-
S3 AWS-EC2 HTML CSS RxJs Redux
Git Jira

PROJECTS

- CCM System
- Bakhabar Kissan App
- Weather Advisory Module
- EzDealz App
- Coin Hunter
- CouponTalkTalk
- ABBC MulticoinWallet

SUMMARY

I am a seasoned Senior Software Engineer with over 6 years of experience specializing in full stack development. My expertise spans various technologies including Node.js and React, enabling me to build robust APIs and applications. Committed to delivering high-quality solutions, I excel in collaborative environments, fostering team growth and innovation. My passion lies in creating secure and efficient code, while continuously learning and adapting to emerging technologies.

EXPERIENCE

Senior Software Engineer

Elixir Technologies 📅 06/2022 – Present 🏠 Islamabad

- Resolved critical bugs and addressed runtime issues in collaboration with customers during various support sessions.
- Developed comprehensive end-to-end use cases leveraging Java (Spring Boot) to deliver robust solutions.
- Assisted cross-functional teams in resolving technical challenges, fostering a collaborative problem-solving environment.
- Managed and maintained pre-developed backend services to ensure their efficiency and reliability.
- Wrote and automated unit, integration, and end-to-end tests to ensure code quality and stability.
- Applied Test-Driven Development (TDD) and automated testing practices to deliver reliable and maintainable code.
- Collaborated closely with product managers and QA engineers to ensure the timely delivery of high-quality software.
- Provided technical support to product users, maintaining clear and effective communication to address their needs.
- Utilized Git for version control to track and manage code changes efficiently.

Senior Software Engineer

Bakhabar Kissan 📅 07/2020 – 06/2022 🏠 Islamabad

- Developed advisory and weather modules using Node.js to provide critical agricultural information, with outputs utilized by IVR and OBD systems.
- Designed and implemented secure RESTful APIs and a scalable database schema for the "Bakhabar Kissan" app, serving diverse platforms like mobile apps and web portals.
- Conducted spatial data analysis on farmers' farms to support data-driven decision-making.
- Utilized RabbitMQ and BullQ to create data synchronization queues across company data centers.
- Delivered training and procedural support to interns, fostering skill development and professional growth.
- Automated media file synchronization across servers using rsync, ensuring operational efficiency.

EDUCATION

Degree: BSCS
University: PMAS Arid Agriculture University
Location: Rawalpindi, Punjab, Pakistan

Full Stack Developer

EzDealz Private Limited   📅 01/2020 – 06/2020   🏠 Islamabad

- **Project Overview:** Delivered a short-term project named EzDealz, a unique mobile gaming application. This app offers users the chance to win instant prizes, cash, and discounted deals from their favorite brands through daily and weekly fun questions, numeric code guesses, and riddles.

- **Key Achievements:**
  - o Developed robust and secure RESTful APIs consumed by both the mobile app and web portal.
  - o Implemented MQTT to sync data in real-time between different apps, ensuring seamless user experience.

Mean Stack Developer

JLD International IT Solutions LLC   📅 12/2018 – 12/2019   🏠 Dubai

- Developed backend services for crypto projects like Coin-Hunter and Coupon Talk Talk, enabling multi-cryptocurrency configuration (ETH, LTC, BTC) and setting up daemons.
- Designed a normalized database schema and an Angular-based dashboard for monitoring and updating app settings.
- Contributed to DevOps tasks, including application deployment and domain mapping on AWS Cloud, ensuring scalability and reliability.
- Gained expertise in blockchain technology, cryptocurrency development, and compliance with international regulatory environments.

Mean Stack Developer

Reactive Space   📅 01/2018 – 12/2018   🏠 Islamabad

- Contributed to the ABBC Multicoin Wallet, enabling users to configure multiple cryptocurrencies like ETH, LTC, and BTC.
- Developed complete backend services in Node.js, deployed daemons for all supported coins, and utilized Firebase for data storage and functions.
- Deployed applications on AWS ECS Cluster, ensuring scalability and reliability.
- Gained practical experience in cryptocurrency development and blockchain technologies, enhancing technical expertise.

Web Developer

Khas Tech   📅 10/2017 – 01/2018   🏠 Islamabad

- Contributed to the development of the Iqra City learning platform, similar to Udemy, during an internship.
- Built the web application using the Laravel framework, gaining hands-on experience with emerging technologies.
- Acquired practical skills and foundational knowledge that shaped professional growth and prepared for future roles.
